

In our efforts to ensure safety of everyone around the mine our Safety, Health and Environment department is conducting Risk Assessment Trainings.

The trainings are aimed at ensuring that all the staff members knows about safety and are able to prevent and protect themselves against accidents before they could happen. According to SHE Officer, Ms. Kekeletso Makhabane this is so that everyone is able to identify any risks on their own and assess its impact.

The trainings are on-going, everybody will be trained. This is an initiative to protect our most valuable asset, our workforce.
